# ~ CAMERA READY AD SPECS ~

**FILE TYPE:** PDF or TIFF at 300 dpi

**COLOR:** CMYK Preferred

**SIZE:** Created ad to the exact size you are running. no bleeds or cropmarks please.

**BLEEDS:** No bleeds or cropmarks.

**OVERPRINT:** Turn off all overprint. It should not show up on any vector art or pdfs you send.

**BLACKS:** Make your blacks 100% Black (K) ONLY.

**CMYK: C:0% - M:0% - Y:0% - K:100%**

- Make sure your black is 100%K, not a CMYK mix, "automatic", "rich black" or "registration".
- Note ANY PHOTOS PLACED IN THE AD, should be placed as CMYK and 300dpi for highest print quality. They should not be too dark because it will print darker, but not too light, they need a high contrast between lights and darks.
- Newsprint is very thin and dries by adsorption which can cause bleeding and spreading ink.
- \*The more layers of ink you have, the more bleeding that will occur. With CMYK printing, each letter is a color plate and the more plates you have printing, make it harder to register. This means that any text that has four color plates printing it, then it will be fuzzy. So, keep all text to one color for a crisper print. Blacks that are not 100%K will print on all CMYK plates and have a greater chance of misregistration and end up looking fuzzy, shadowed and hard to read.

## FONTS:

- Use standard fonts like Arial, Helvetica, Times, etc.
- Avoid decorative or script fonts.
- Avoid fonts with special characters or ligatures.
- Avoid fonts that are too small or too large.
- Avoid fonts that are too bold or too light.
- Avoid fonts that are too narrow or too wide.
- Avoid fonts that are too tall or too short.
- Avoid fonts that are too slanted or too upright.
- Avoid fonts that are too italicized or too normal.
- Avoid fonts that are too condensed or too expanded.
- Avoid fonts that are too stretched or too compressed.
- Avoid fonts that are too distorted or too regular.

**PHOTOS:** 300 dpi - 3"x3" min. We prefer a jpg or tif file, if possible.

- Note that we prefer to crop the photos ourselves, if you would like us to crop it a specific way, please request it and we will be happy to do it.
- When taking photos, it is helpful to have some of the area around the property so we can move it around on the page and depending on if it is a horizontal or vertical ad. If you crop it the photo right to edge, it limits the artist what we can do with it. More is better and we can crop it so it stands out the way it needs to.
- When sending photos of realtors, please send a clear photo of the whole person. We prefer headshots that do not have the head cut off.
- Also, if you want text on your photo, we prefer to place the text our self because we can make it large enough to print well and we can make the photo fit a certain size. When you place text on the photo or crop it, you limit what we can do with it.
- When placing photos in Camera Ready ads, place them at 300 dpi so that they print clearer.

**LOGOS:** 300 dpi - 3"x3" min.

We prefer an Illustrator file, if possible. Vector files always are preferred if possible.

## FILE TYPES ACCEPTED:

- ! .jpg, .pdf, .tif, .eps, .ai, .psd
- ! InDesign with everything packaged: Fonts, graphics, links, etc.
- ! Word documents or Excel are okay but not preferred.
- ! We DO NOT accept publisher files.
